X-Road® Joins Europe's Tech Sovereignty Catalogue

[X-Road®](#), the secure, open-source data exchange layer developed and managed by the [Nordic Institute for Interoperability Solutions \(NIIS\)](#), has been officially included in the [Tech Sovereignty Catalogue](#), a key European initiative that maps trusted digital solutions developed in Europe.

The Tech Sovereignty Catalogue showcases European-built technologies across cloud, connectivity, cybersecurity, data infrastructure, and AI, helping innovators, policymakers, and industry stakeholders find and adopt sovereign-by-design tools that strengthen Europe's digital autonomy and competitiveness.

By joining the catalogue, NIIS and X-Road contribute to building a robust ecosystem of secure alternatives that support Europe's strategic objective of technological independence. The listing underscores X-Road's role as a trusted digital solution, enhancing visibility among European public and private-sector organisations seeking sovereign digital infrastructure.

Nordic Institute for Interoperability Solutions (NIIS) is a non-profit association with the mission to ensure the development and strategic management of [X-Road®](#) and other cross-border solutions for digital government infrastructure.

NIIS is both a network and cooperation platform and executioner of IT developments in members' common interests. The institute focuses on practical collaboration, sharing of experience and promoting innovation. The operating model of the institute is something unique in the world.

The republics of Estonia, Finland and Iceland are members of NIIS, and the Faroe Islands and the Government of Åland are partners of NIIS.
