X-Road identified as one of the key projects by the Digital Public Goods Alliance

X-Road® has been reviewed by the [Digital Public Goods Alliance \(DPGA\)](#) and found to be a digital public good in alignment with the [Digital Public Goods Standard](#).

The Digital Public Goods Standard is a set of specifications and guidelines designed to maximize consensus about whether something conforms to the definition of digital public goods laid out by the UN Secretary-General in the [2020 Roadmap to Digital Cooperation](#).

X-Road now appears in the [digital public goods registry](#) where it will be discoverable as a digital public good and reflected on a growing network of catalogues and aggregated lists of digital public goods.

Besides, X-Road has been identified by the DPGA [Financial Inclusion Community of Practice](#) as one of seven key projects at the critical intersection of digital public goods (DPGs) and digital public infrastructures (DPIs).

[X-Road](#) is open-source software and ecosystem solution that provides unified and secure data exchange between organisations. X-Road is released under the [MIT open source license](#) and is available free of charge.

Nordic Institute for Interoperability Solutions (NIIS) is a non-profit association with the mission to ensure the development and strategic management of X-Road® and other cross-border components for e-government infrastructure.

NIIS is both a network and cooperation platform and executioner of IT developments in members' common interests. The institute focuses on practical collaboration, sharing of experience and promoting innovation. The operating model of the institute is something unique in the world.
